Vectoring dose response: before and after certificate repair

20 s quality matching · 15 km peak offset · 10 s Encoder input · full dose range · $R^2 \geq 0.94$

Order 1 (after) · Order 2 (after) · Order 3 (after) · Order 4 (after) · Order 5 (after) · Before: mean · After: mean

Only Sep 15 gains an injectable aircraft (3c6709); all other curves overlap exactly. N: background aircraft; K: injectable aircraft.

Local time UTC+08. Same vertical scale within each scene column. Segmented is schematic; its trajectory does not inherit the smooth motion certificate.
